

40. FLOW OF GASES AND STEAM THROUGH NOZZLES

Jiří Škorpík

- Converging nozzle 1
- Ideal contour of converging nozzle 3
- State at exit of converging nozzle 4
- De Laval nozzle (converging-diverging nozzle) 5
- Frequent contours of de Laval nozzles 6
- Flow inside de Laval nozzle at non-nominal states 8
- Flow through oblique cut nozzle 10
- Flow through nozzle at losses 11
- Efficiency of nozzle 12
- Contraction of flow and mass flow coefficient 12
- Some applications of nozzle theory 13
- Nozzle as blade passage 13
- Rocket engine 14
- Flow through group of nozzles, flow through group of turbine stages 15
- References 16
- Appendices in Czech
